Torrance-Made Firebees Put Hot Pilots of Air Force to the Test

Despite hampering weather conditions, pilots of the Air Defense Command have provided their salt against spunky, Ryan Firebee jet target missiles at Project "William Tell II," the 1959 U. S. Air Force Worldwide Weapons Meet at Tyndall Air Force Base, Fla.

For the first time in a military weapons meet, Air Force interceptor teams defended the coast of Florida against night "attacks" by Ryan Firebees.

In another weapons meet "first", the jet fast Firebee attacked the Tyndall area in dual formations, to challenge the effectiveness of the nation's air defense curtain.

RAINY CONDITIONS soaked the Florida countryside, but didn't dampen the spirits of the 12 four-man interceptor teams from U.S. and foreign air defense bases entered in the meet at Panama City.

The Firebee's effective night and formation attacks have broadened the scope of realism prevalent at the William Tell meet, providing a true test of the skill and quality built into the men, planes and missiles of the Air Defense Command. Teams take the new,

simulated combat conditions in the "enemy" operation in stride as they "scramble" to seek out and destroy the elusive remote controlled target with blinding speed and effectiveness.

THE 1959 MEET marks the second consecutive year the Firebee jet targets have exclusively simulated the enemy at the Air Force meet. The speedy, remote controlled birds made history last year when they were designated the first free-flying targets ever used in a military weapons meet... Project "William Tell I".

Late reports from Tyndall reveal the Firebees have flown more than 30 hours of simulated enemy attack missions ranging in altitude from below 15,000 feet to above 30,000 feet. Average flight time per Firebee mission is more than 30 minutes, allowing several "hot runs" by the Air Defense interceptors. Direct guided missile hits scored by many of the teams have raised havoc with the Firebees' overall flight time log.

IN ONE NIGHT mission, an unarmed version of the first Genie air-to-air rocket ever fired in a night competition scored a direct hit for the 29th Fighter Interceptor Squadron of Malstrom Air Force Base, Great Falls, Mont. Launched from an F-89 Scorpion by Col. William A. Jones of Ontario, Calif., the deadly Genie closed on the Firebee at over 1000 miles an hour.

In opening day competition, Captain Frederick H. England, Jr., scored a direct hit on the Firebee from his F-102 Delta Dagger. His wing man, Captain Ernie W. Chiles Jr., followed the Firebee wreckage on his radar, locked on, and smashed the Firebee with a second direct hit as it tumbled into the Gulf of Mexico.

PROJECT "William Tell II" ended Friday with the Air Defense teams flying F-104 Starfighters and F-100 Super Sabres (for the first time this year) F-89J Scorpions and F-102A Delta Daggers.

For the first time also this year, the heat-seeking Falcon GAR-2 and Sidewinder GAR-8 missiles were fired in this weapons meet. Other weapons in the meet includes the unarmed version of the atomic warhead, MB-1 Genie rocket, and the GAR-1D radar version of the Falcon guided missile.

Hearing Set On Carson Zoning Case

A public hearing was set Tuesday by the County Board of Supervisors for rezoning 4.5 acres in the Carson area.

Supervisor Burton W. Chace said the hearing for the proposed change of zone will be held in the Board Room on Nov. 19, at 9:30 a.m.

The area affected is on the northeast corner of the intersection of Vermont Ave. with 228th St. The petitioner is James A. Norris, 1703 W. 127th St., Los Angeles.

Already approved by the Regional Planning Commission, the request is for the 4.5 acres to be rezoned from A-1 (light agriculture) and C-4 (unlimited commercial) to R-1 (single family residence).

The Commission at its public hearing on Sept. 29 found that the proposed change would conform to the proposed development of the property and thus would protect the future occupants of this residential development.

Ryan Votes Dividend of Five Cents

A regular quarterly dividend of 5 cents per share on common capital stock was declared Tuesday by the Board of Directors of the Ryan Aeronautical Co. The 5-cent cash dividend is payable Dec. 4 to stockholders of record Nov. 13.

At the same time, the Ryan Board announced that company stockholders had approved an increase in authorized common stock available for issuance under the articles of incorporation from 2 million to 3 million shares, and a stock option plan for selected employees. The option plan would be limited to 100,000 shares, to be issued at the discretion of the Ryan Board of Directors.
